AIR IMPACT HAMMER FOR TIE ROD

Bat-Truck EVO

Air impact hammer for releasing bars and mechanical linkage

The air impact hammer is a valid aid for releasing bars and tie rods that are rusty or stuck.

Hammers, blowtorch and sprays are normally used but they are not always effective. Sometimes, two people are required to unlock very rusty bars.

The operator can work alone in tight spaces with the air impact hammer without damaging the mechanical parts.

Simply the operator inserts the tool on the bar and turning it and the bar will be ready for adjustment in just a few seconds.

It is important to adjust the air intake flow for efficient percussion based on the bar to be released.

Ideal for use together with the hand tool for tie rod.

- **The evolution of Bat Truck**
- Reinforced structure
- Coupling made with CNC machines for greater precision
- **3200 bpm high performance pneumatic tool**
- **Increased threaded anchoring for improved durability**
- Knocker made by hardened steel
- **Increased performance and reliability (compared to mod. Bat Truck)**
- **Ergonomic handle with anti-fatigue button**
- 360° rotation for maximum access in tight spaces
- Low maintenance with daily lubrication
- **Integrated shock absorbing system**
- Compliant with all sizes of tie rod for road tractors, trailers and semi-trailers
